

Kattex

Multiuse portable hydraulic tools
for the incising and locking of tubes

Maintenance

Pre-welding / Tack expansion

A winning story since 1961

The Beginning

At the end of the 1950s, Domenico Franco Agostino became the Italian representative of Albert Otto, a German manufacturer of tube expanders. In 1961 Franco Agostino's Albert Otto Italiana was founded and in 1972, after purchasing an area of 10,000 square metres in the municipality of Bagnolo Cremasco, Maus Italia Sas was established.

The Growth

In 1976 his son Stefano, a mechanical engineer, joined the company. Together with his father, he studied products, introduced new machinery onto the market and filed the first patents by Maus Italia. Above all, Stefano was firmly convinced that people are the very heart of a company's success. Therefore, he invested in human capital by valuing people and roles, and he surrounded himself with skilled operators as well as technical, commercial and administrative collaborators. The result was a winning, competent and proactive team.

His daughter Anna - also a mechanical engineer - has been working in the company since 2016, giving new impetus and energy to the business her father and grandfather had built.

Father and daughter work together side by side every day to guarantee the excellence of Maus Italia and support all customers worldwide with competence and passion: the company's distinctive traits.

Stefano Agostino
CEO - Mechanical Engineer

Anna Agostino
COO - Mechanical and Management Engineer

In-house production of each component Workshop 4.0 and 24/7 production control

The production of Maus Italia branded items is entirely carried out in Bagnolo Cremasco, in the heart of an Italian industrial area 30 km southeast of Milan.

The company boasts a 4.0 workshop equipped with state-of-the-art machinery, an in-house heat treatment room and a final inspection department that allow Maus Italia to independently manage every phase of the manufacturing process of its wide range of products whilst maintaining high quality standards.

Quality first. Design and development

One of Maus Italia's strengths is its willingness to understand its customers' needs.

Our technical department is always ready to find operational solutions to the most complex applications, even via feasibility studies. We develop accurate work processes, draw with FEM analyses to verify our mechanical-structural performance and optimise the manufacturing process of each component.

Quality, environment and safety policy

Research, quality and safety are the watchwords of Maus Italia Spa.

Maus Italia has several projects underway aimed at increasingly sustainable development and integrates environmental concerns into its business model. The company's actions, behaviour and development choices are focused not only on the short run but rather mainly on a medium and long-term horizon.

Ready To Deliver

A well-stocked and complete warehouse of finished products enables Maus Italia ship quickly to customers all over the world according to a ready-to-deliver logic.

The warehouse is fully located within our premises in Bagnolo Cremasco at controlled temperatures and conditions to guarantee the maximum safety and quality of Maus Italia products for all our customers.

Every day in over 80 country worldwide

KattexCut

Ensures the rapid recovery of the tubesheet by facilitating tube extraction

Maus Italia has solved the problem of tubesheet safeguarding and recovery during the dismantling of heat exchangers. The KattexCut, a patented Maus Italia product, instantly cuts the tubes from the tube bundle from the inside, without the production of swarf, thus facilitating subsequent operations, such as:

- the extraction of the tube pieces with Grippul series extractors
- the extraction of the tubes with Runpul series continuous extractors

Instant cuts the tubes from the tube bundle from the inside

KattexFix

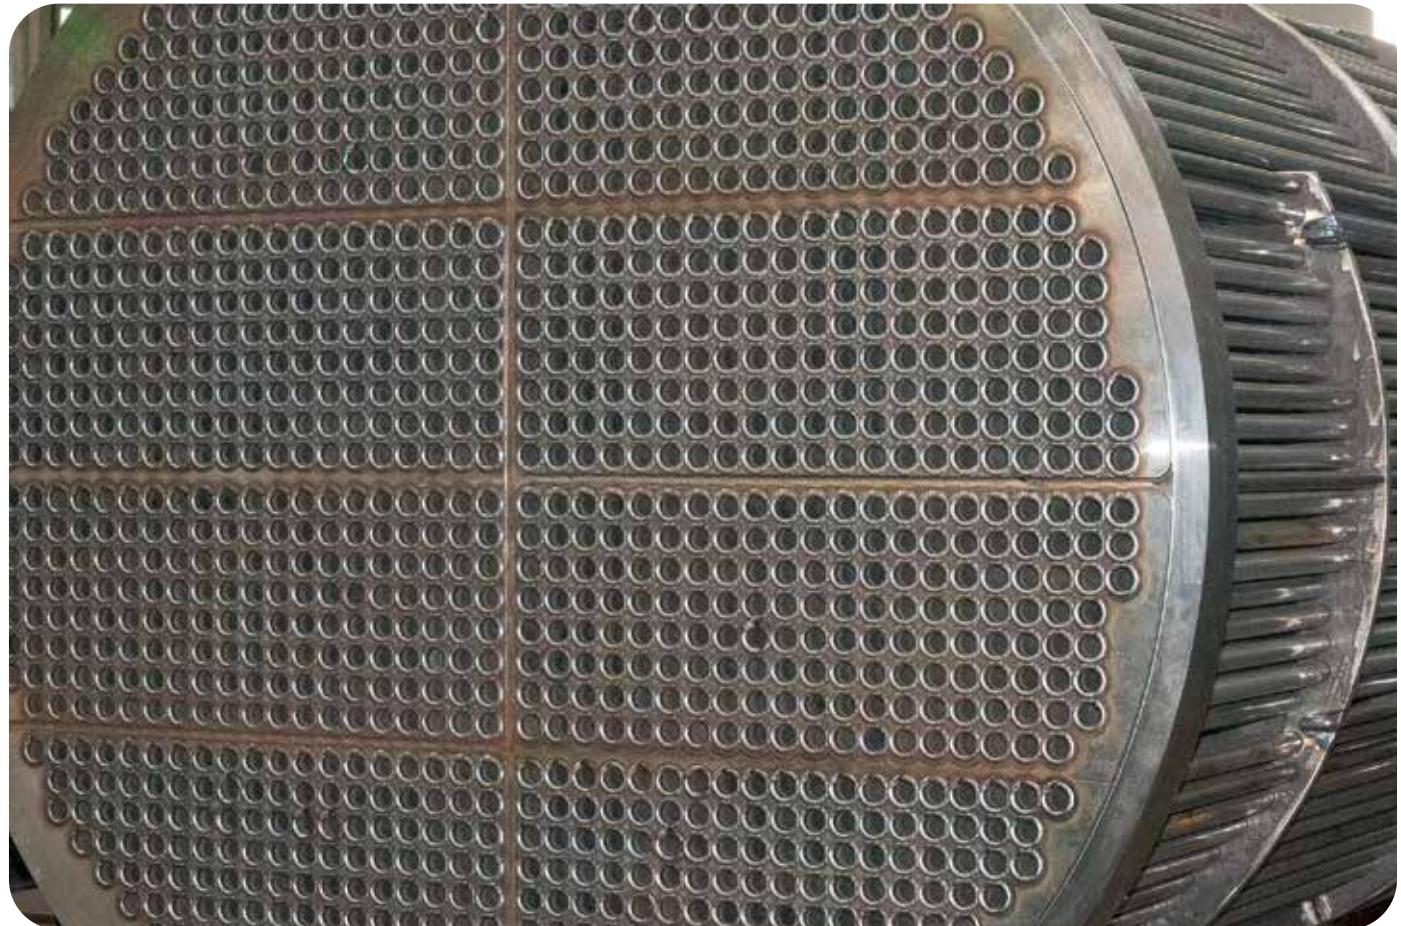

Ensures precise tube-tubesheet hole centring with controlled locking of the tube (pre-welding)

Maus Italia has solved the problem of centring and locking tubes to the tubesheet before orbital TIG welding during the assembly of heat exchangers.

The KattexFix, a Maus Italia patented product, instantly expands tubes in the tube bundle from the inside, (controlled mechanical expansion or "tack expansion"), replacing it at the weld point, thus facilitating the subsequent operation of:

- TIG orbital welding with Giotto series equipment

Pre-welding or tack expansion

Main features

KattexCut

Instant

Using hydraulic drive the KattexCut device gives the tools a radial expansion by incising the tube thickness creating the breaking point, ensuring high productivity.

Swarf free cutting

The KattexCut thanks to its patented cutting system, does not leave any metallic residue inside the tube, giving a result which is always "clean".

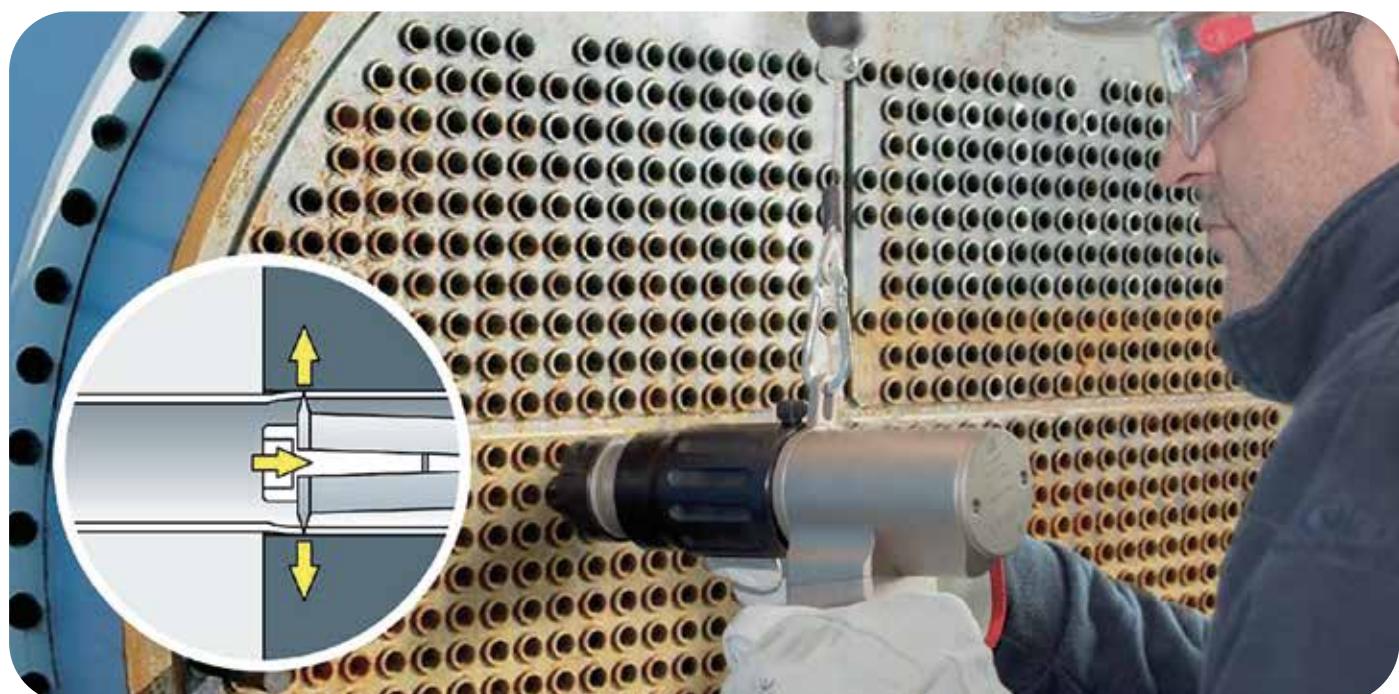

Wide range of application

Thanks to the two different sizes of Kattex, the KattexCut device allows the intervention on tubes up to 4" (101,60 mm) for the production of industrial boilers.

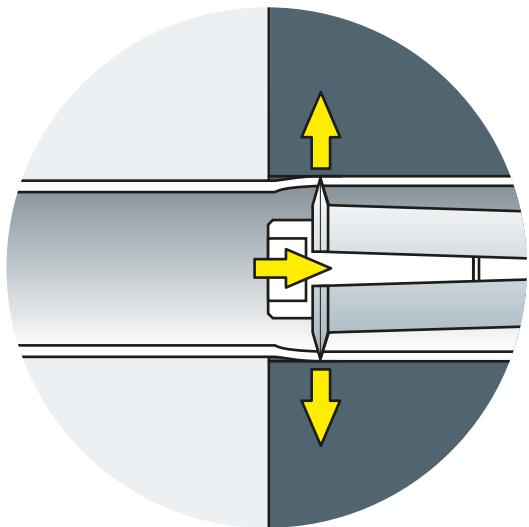

Different power supplies

The KattexCut's hydraulic drive is given by using the Maus Italia TP2 series hydraulic power units in either the Electric or Pneumatic versions.

I Work procedure

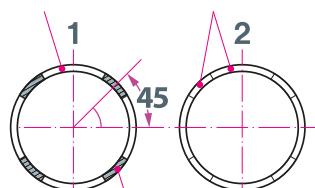

KattexCut

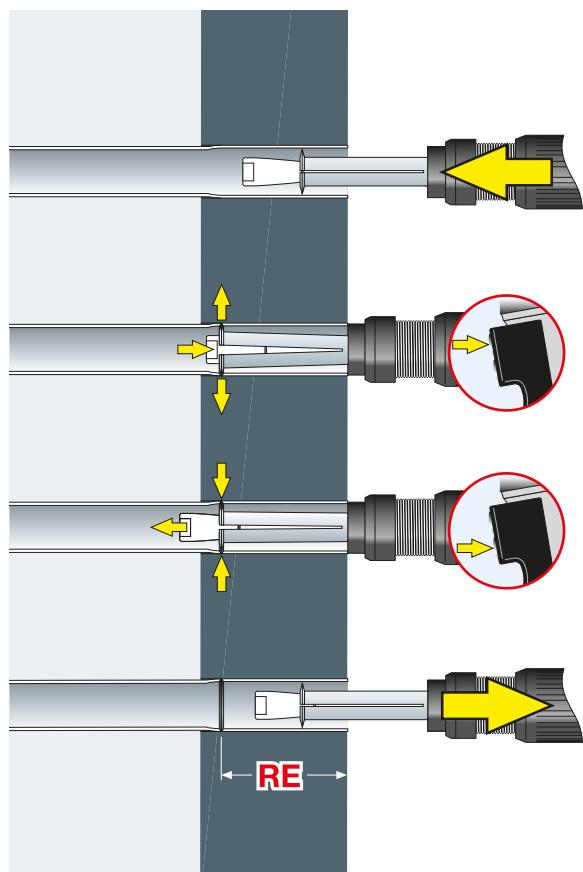

The KattexCut works on the inside of the tube to be cut and, thanks to the hydraulic force from its dedicated power unit, expands the incisor/cutter (K5K or K12K) that penetrates the thickness of the tube. The incising of the tube is sufficient to create a breaking point and facilitate subsequent extraction operations.

If necessary, for a complete cutting of the tube, repeat the operation by rotating the device (example opposite shows 4 sectors on the side).

Cut tube sector

Attached tube sector

1 *Insertion*

Insert the KattexCut into the tube as far as the thrust collar.

2 *Instant cutting*

Press the button until the tube is incised.

3 *Release*

Press the button until the tool unlocks and the tube is released.

4 *Removal*

Extract the KattexCut from the cut tube and proceed with cutting or with the extraction of the tube stub with a Grippul series extractor.

Main features

KattexFix

Instant

Using hydraulic drive, the KattexFix gives the tools an instant radial expansion guaranteeing high productivity.

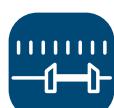

Controlled tube locking (tack expansion)

Thanks to the innovative tools designed by Maus Italia's technical staff, the radially-expanded tube is centred in the tubesheet hole and is locked, giving optimal conditions for the next weld.

Controlled work times

The new dedicated TP2EQ2 hydraulic power unit integrates control of the entire work period (expansion/permanence time and release/stop time), allowing a high level of repeatability.

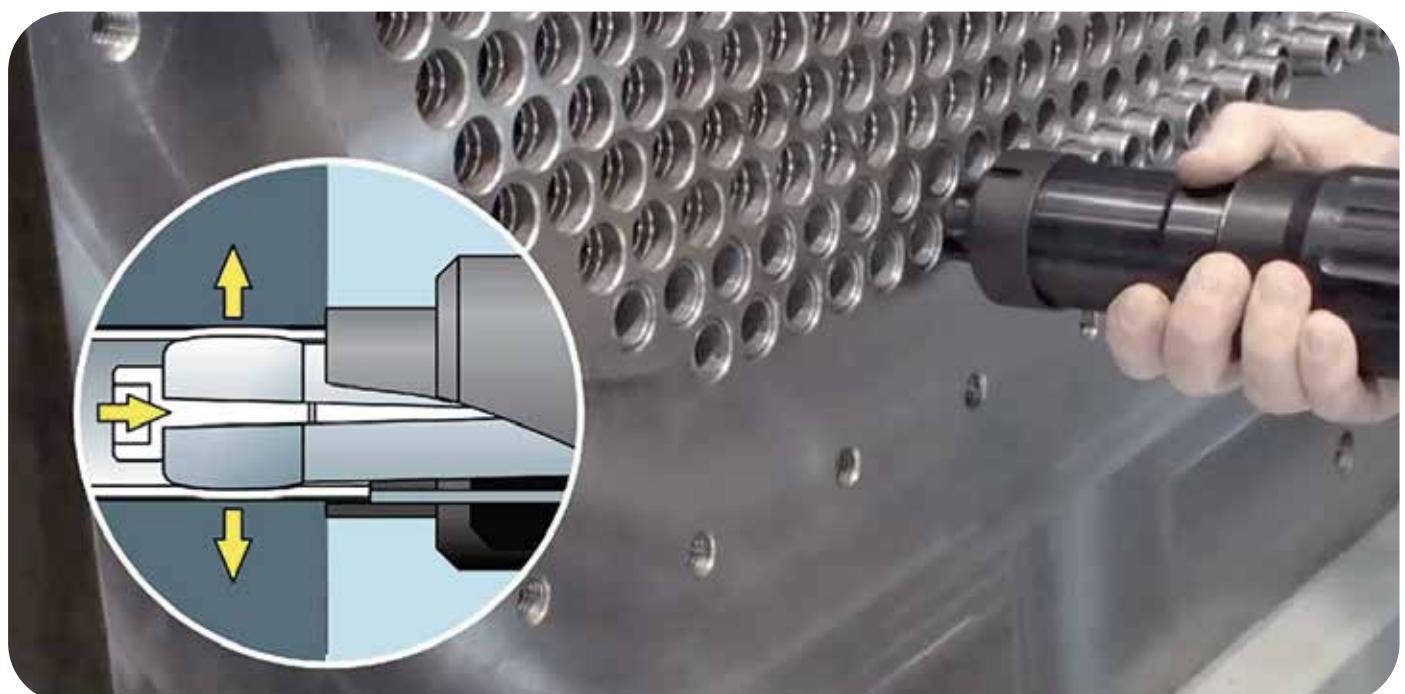

Wide range of application

Thanks to the two different sizes of Kattex, the KattexFix device allows the intervention on pipes up to 4.1/4" (107,95 mm) for the production of industrial boilers.

Alternative power supplies

The KattexFix's hydraulic drive is given by using the the Maus Italia TP2 series hydraulic power units in either the Electric or Pneumatic versions.

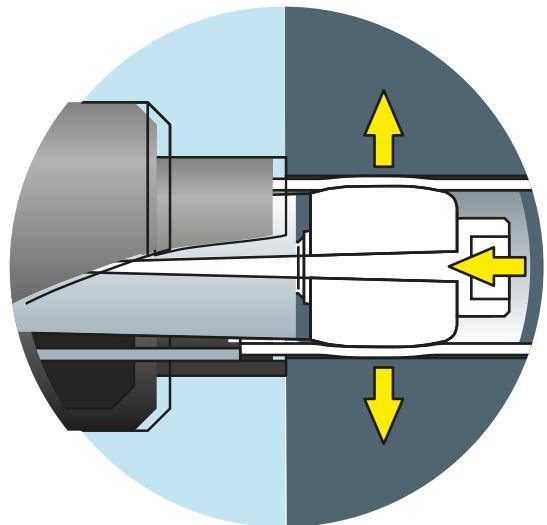

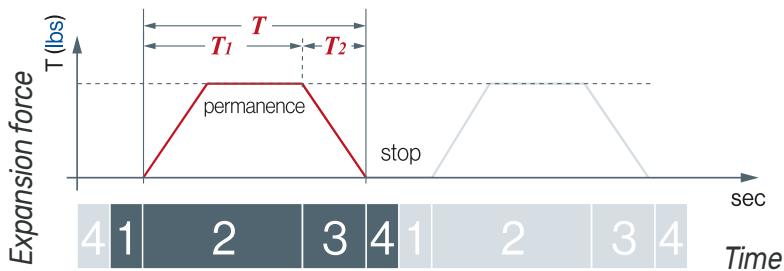

I Work procedure

KattexFix

The KattexFix, works on the inside of the tube and, thanks to the hydraulic force from its dedicated power unit, expands the locking tool (K5PS or K12PS) for tube expansion.

The centring of the tube in the tubesheet hole is achieved through the expansion of the tool.

Automatic cycle

Press and release button 1

T1 Instant locking

Achievement of the programmed expansion from the hydraulic power unit and permanence of the expansion force until the tube is locked.

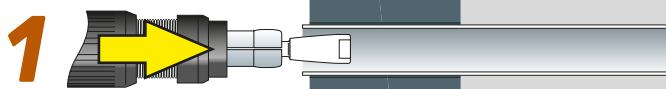

T2 Instant locking

Unlocking of the tool and complete release from the tube.

Button 2 stops the automatic cycle as and when needed.

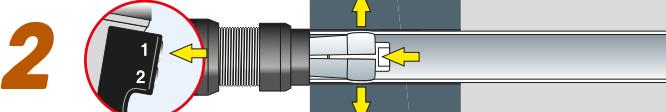

Insertion

Insert the KattexFix into the tube as far as the thrust collar.

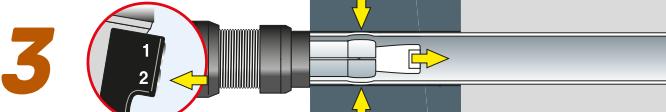

Instant locking

Hold down button 1 until the pressure programmed on the hydraulic power unit is reached.

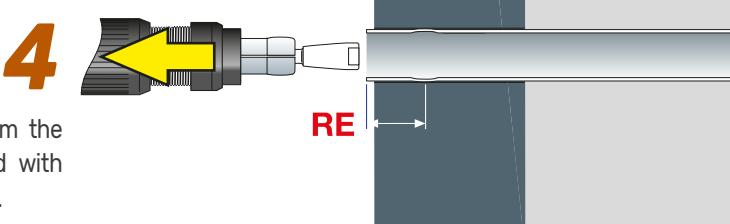

Release

Hold down button 2 until the tool unlocks and completely released.

Removal

Extract the KattexFix from the locked tube and proceed with the next locking operation.

Kattex6E

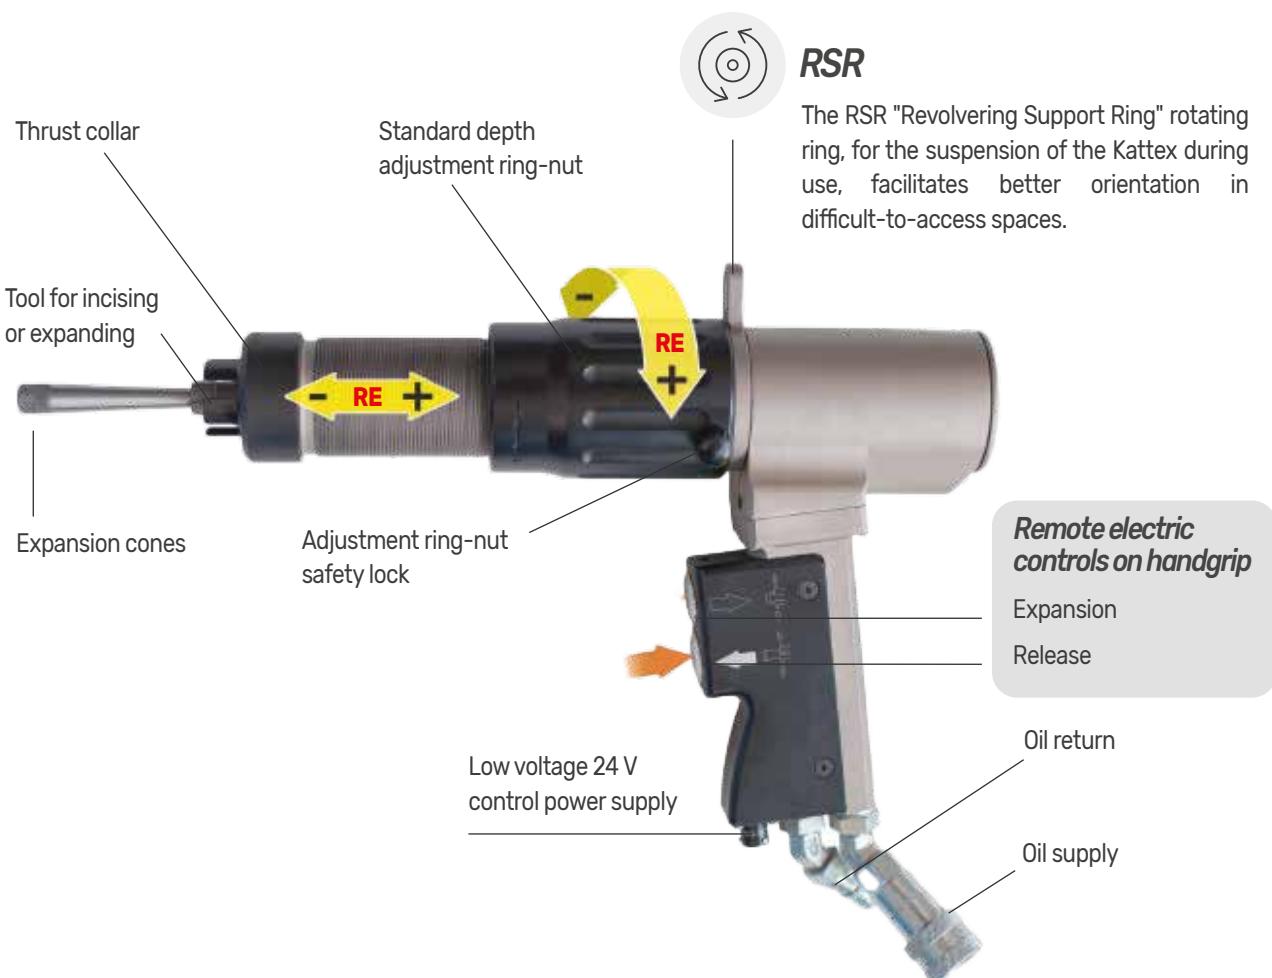

Kattex12E

Multiuse Electric hydraulic tools

Electric hydraulic power unit

Maus Italia TP2 series Electric hydraulic power unit recommended for use with Kattex6E and Kattex12E

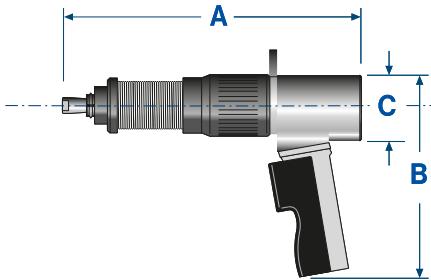

RSR

The RSR "Revolvering Support Ring" rotating ring, for the suspension of the Kattex during use, facilitates better orientation in difficult-to-access spaces.

Standard supply

- Hydraulic tool: Kattex 6E or Kattex 12E
- Set of cone reducer couplings
- Set of cutter reducer couplings
- Set of service wrenches
- Thrust collar extension
- Multipole electric cable (with TEAFLEX conduit) - Length 6 m (19.7 ft)
- 2No. R8 - 1/4hydraulic hoses (oil supply and return) - Length 6 m (19.7 ft)
- Instruction manual
- Carrycase

**Pre-weld
Tack expansion**

KattexFix 6

**Instant hydraulic tube locker for tubes with OD
from 3/8" (9,52 mm) up to 1.1/2" (38,10 mm)**

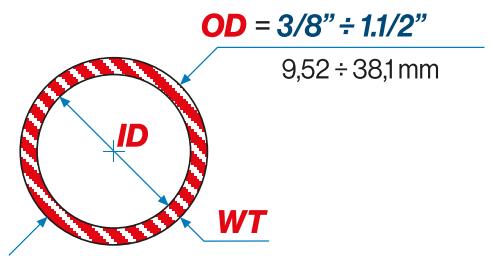

Rapid and precise

**High repeatability
thanks to controlled expansion time**

Adjustable standard depth
 $RE = 10 \div 75 \text{ mm (} 0.394'' \div 2.953'' \text{)}$

Driving head K5TDB and K12TDB

The thrust collar in contact with the surface of the tubesheet defines the expansion depth. An internal ring-nut establishes and maintains the correct protrusion of the tube during locking with the KattexFix 12.

KattexFix 12

**Instant hydraulic tube locker
for tubes with OD

LTP6

*Optional accessory for the KattexCut 6
for the removal of surplus tube with a protrusion "V"
up to 150 mm (≈6")*

Ensures the removal of the protruding tube as a whole, speeding up end-facing with a consequent reduction in wear of the tools.

*For tubes with an external diameter **OD**
from 12,7 to 38,1mm (1/2"÷1.1/2")*

LTP 6/90

Protrusion "V" up to 90mm (≈3,5")

LTP 6/150

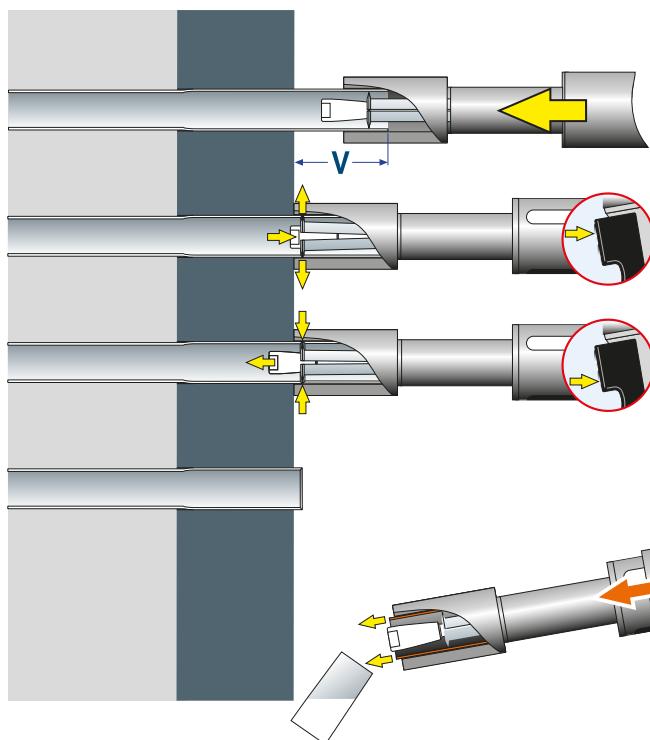

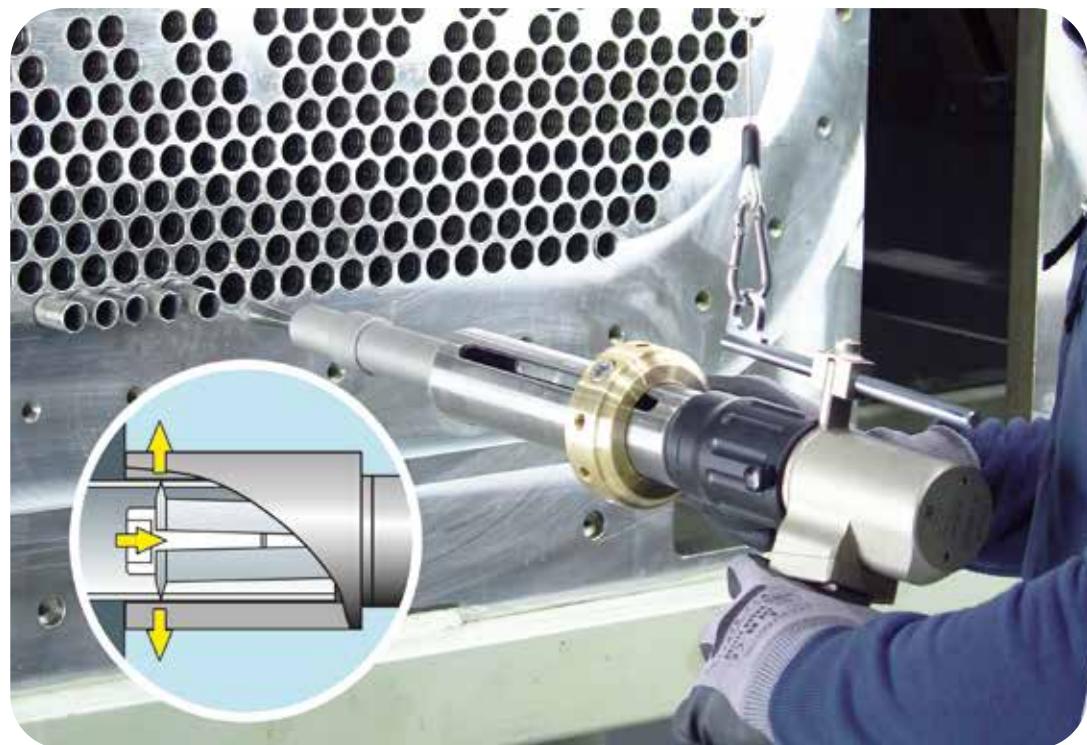

Protrusion "V" up to 150mm (≈6")

Indicated for applications on systems
where limited access to the tube does not permit
traditional external cutting.

I Work procedure

1 Insertion

Insert the KattexCut 6 with the LTP 6 accessory in the protruding tube as far as the thrust collar.

2 Cutting

Press the button until the tube has been incised. Repeat the operation, rotating the device, for the complete cutting of the tube.

3 Release

Press the button until the tool unlocks and the tube is released.

4 Removal of the stub

Remove the stub by pressing it with the ejector and proceed to the next tube.

Electric hydraulic power unit

The TP2E electric hydraulic power unit is a lightweight and economic piece of equipment designed and manufactured by Maus Italia to power hydraulic Kattex devices.

- Voltage: V-ph 400-3
- Frequency: Hz 50/60
- Installed power: kW 1,1
- Voltage for commands: V 24

➤ Dimensions:

Length: 370mm / 14.5 inches
Width: 280mm / 11.0 inches
Height: 650mm / 25.6 inches
Weight (no-oil): 33kg / 73 lbs
Weight (full load-oil): 40kg / 88 lbs

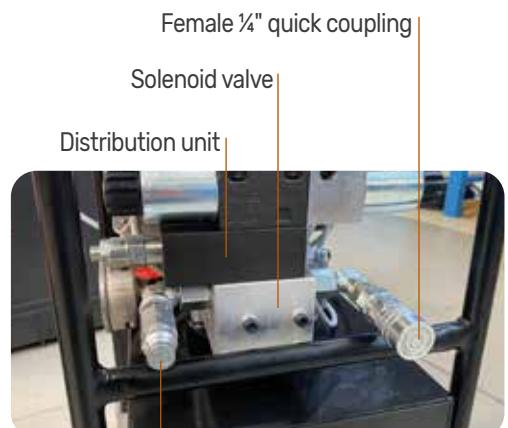

Noise level: <70 (A) dB

Level of protection: IP 55

Colours: RAL 7035-9005

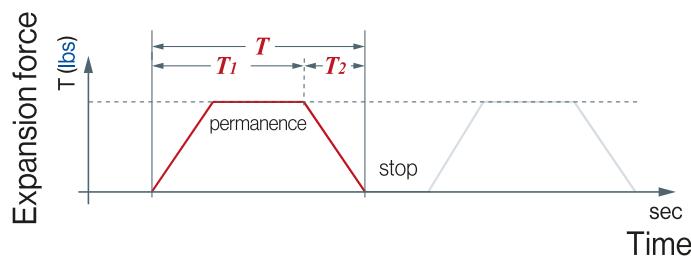

➤ Work capacity

Max oil flow rate: 1.8 l/min - 0.47 USgpm
Min Pressure: 40bar / 580psi
Max pressure: 320bar / 4641psi
Tank capacity: 8 l - 2.1 Us Gal
Hydraulic oil: ISO H46

TP2EQ2

Electric hydraulic power unit with cycle control for KattexFix

- > Voltage: V-ph 400-3
- > Frequency: Hz 50/60
- > Installed power: kW 1,1
- > Voltage for commands: V 24

> Dimensions:

Length: 520mm / 20.4 inches
Width: 330mm / 12.9 inches
Height: 815mm / 32.0 inches
Weight (no-oil): 47kg / 103 lbs
Weight (full load-oil): 61kg / 134 lbs

Noise level: <70 (A) dB

Level of protection: IP 55

Colours: RAL 7035-9005

> Work capacity

Max oil flow rate: 1,8 l/min - 0.47 USgpm
Min Pressure: 40bar / 580psi
Max pressure: 320bar / 4641psi
Tank capacity: 16 l - 4.2 Us Gal
Hydraulic oil: ISO H46

► Automatic cycle

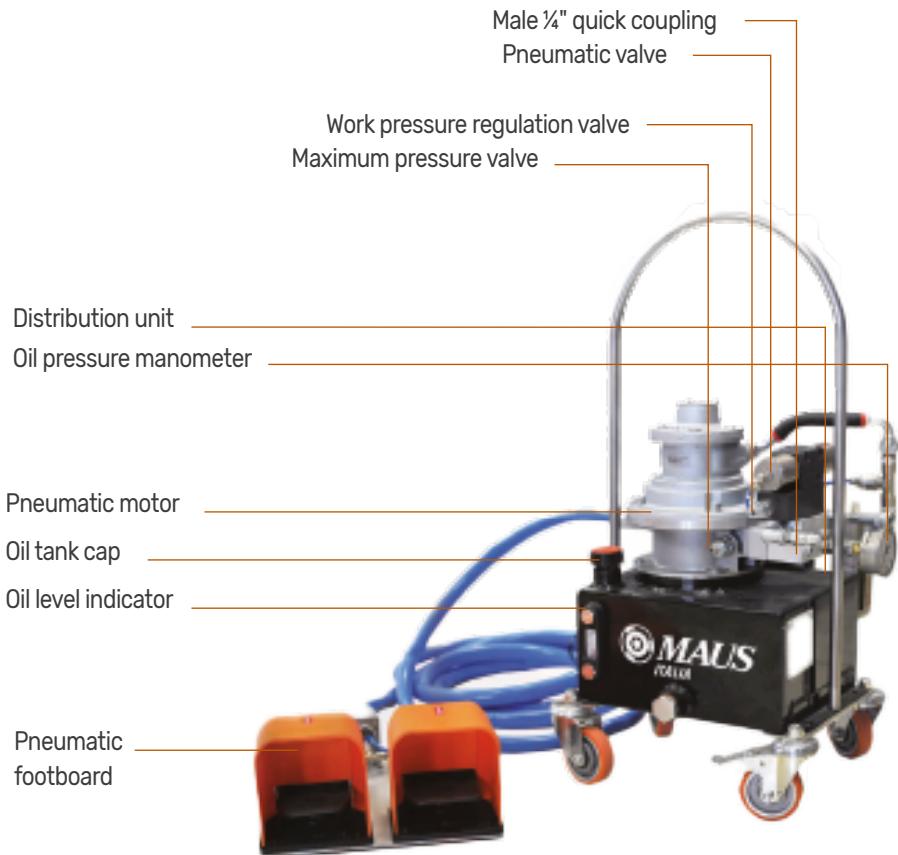

An evolution of the TP2E entry level model, the TP2EQ2 has been designed and manufactured by Maus Italia to power KattexFix devices where sensitivity and control in the locking of tubes (tack expansion) is fundamental.

An adjustable timer allows you to set the two expansion control times (**T₁** expansion+permanence and **T₂** return time) to guarantee the sure repetition of the "T" work cycle with a significant increase in efficiency.

For all components for the TP2EQ2, please refer to the configuration alongside TP2E.

TP2P

Pneumatic hydraulic power unit

- Pressure: 5-7bar / 72-101psi
- Absorbed power: 3 kW
- Air consumption: 3000 l/min - 792 US gpm

➤ Dimensions:

Lenght: 370mm / 14.6 inches
Width: 280mm / 11.0 inches
Height: 650mm / 25.6 inches
Weight (no-oil): 36kg / 79.3 lbs
Weight (full load-oil): 43kg / 94.7 lbs

Noise level: <87 (A) dB

Colours: RAL 9005

➤ Work capacity

Max oil flow rate: 1,8 l/min - 0.47 USgpm
Min Pressure: 40bar / 580psi
Max pressure: 290bar / 4205psi
Tank capacity: 18 l - 2.1 Us Gal
Hydraulic oil: ISO H46

The TP2P hydraulic power unit is a lightweight and economic piece of equipment, designed and manufactured by Maus Italia to power hydraulic Kattex devices in the machining for the internal cutting of tubes. Comes supplied with a foot-controlled pneumatic remote control for controlling the loading/return of oil during use.
